

COMSATS University Islamabad Lahore Campus

Quiz #1 of Web Technologies, SP26, Apr, 6, 2026 [10 Marks]

Reg. ID, Name, Section _____, _____, A

Question 1: CLO 2: <Demonstrate the capabilities for developing professional front-end using client-side technologies.>

Question 1.1 (5 Marks): Create an HTML form with proper labels containing the following input controls. The form must use the **POST** method and submit data to the endpoint **/process-form**.

Create a radio button group to select between **Day Scholar** and **Hostelite** such that only one option can be selected at a time. The input name must be **scholar-type**, and by default **Day Scholar** should be selected.

Create a dropdown list (select) containing the cities **Lahore, Islamabad, Faisalabad** in the same order. The input name must be **city**, and by default **Faisalabad** should be selected. The submitted value should be the first letter of the selected city (L for Lahore, I for Islamabad, F for Faisalabad).

Create two submit buttons labeled **Save Draft** and **Submit for Approval**. These buttons should submit the form with the name **action-type**, and the value should correspond to the button that is clicked.

Question 1.2 (5 Marks): Consider below HTML/CSS, what would be the total width (including border, padding, and content area) of each items, when the content would be rendered on canvas?

```
<div class="container">
  <div class="item1">Item 1</div>
  <div class="item2"></div>
  <div class="item3"></div>
</div>
```

```
*{
  box-model: border-box;
  margin: 0px;
  padding: 0px
}
```

```
.container {
  display: flex;
  width: 900px;
  border: 20px solid black;
  padding: 30px;
}
```

```
.item1 {
  /* assume content would take 150px. */
  flex-basis: 90px;
  flex-grow:1;
}
```

```
.item2 {
  flex-basis:auto;
  width: 180px;
  flex-grow:2;
}
```

```
.item3 {
  flex-basis: 140px;
  flex-grow:0;
}
```

Item 1: _____ px

Item 2: _____ px

Item 3: _____ px
