

# Lab Assignment # 01

## Title:

## Lab # 03 (Wireshark)

## Submitted to :

- **Instructor :** Ma'am Nida Mumtaz
- **Course :** Artificial Computer Networking (CSC-275)

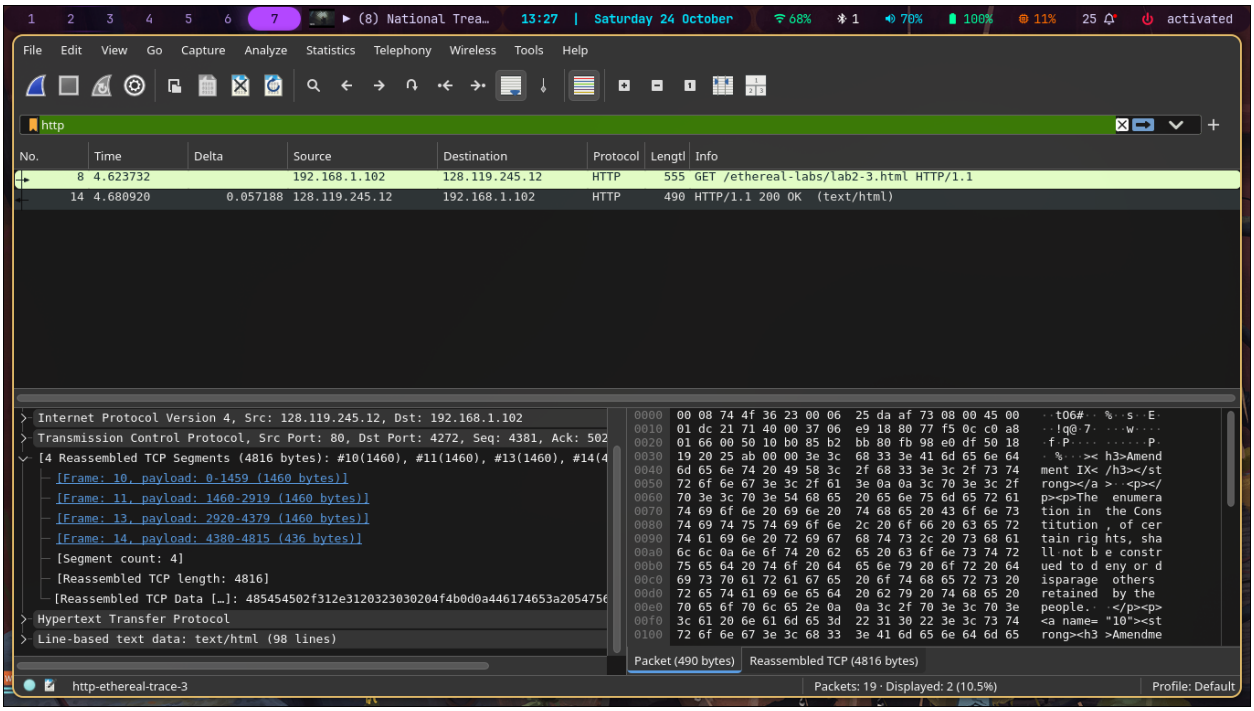

## Submitted by:

- **Name :** Sannan Ahmad
- **Reg #** (SP25-BSE-118)
- **Section** A

Date of Submission:

23 October , 2026

# Activity 3 :

## Ans12:

1 HTTP GET request message was sent by my browser. The GET message for the Bill of Rights is in packet number 8.

## Ans13:

The status code and phrase of the response (HTTP/1.1 200 OK) are contained in packet number 14.

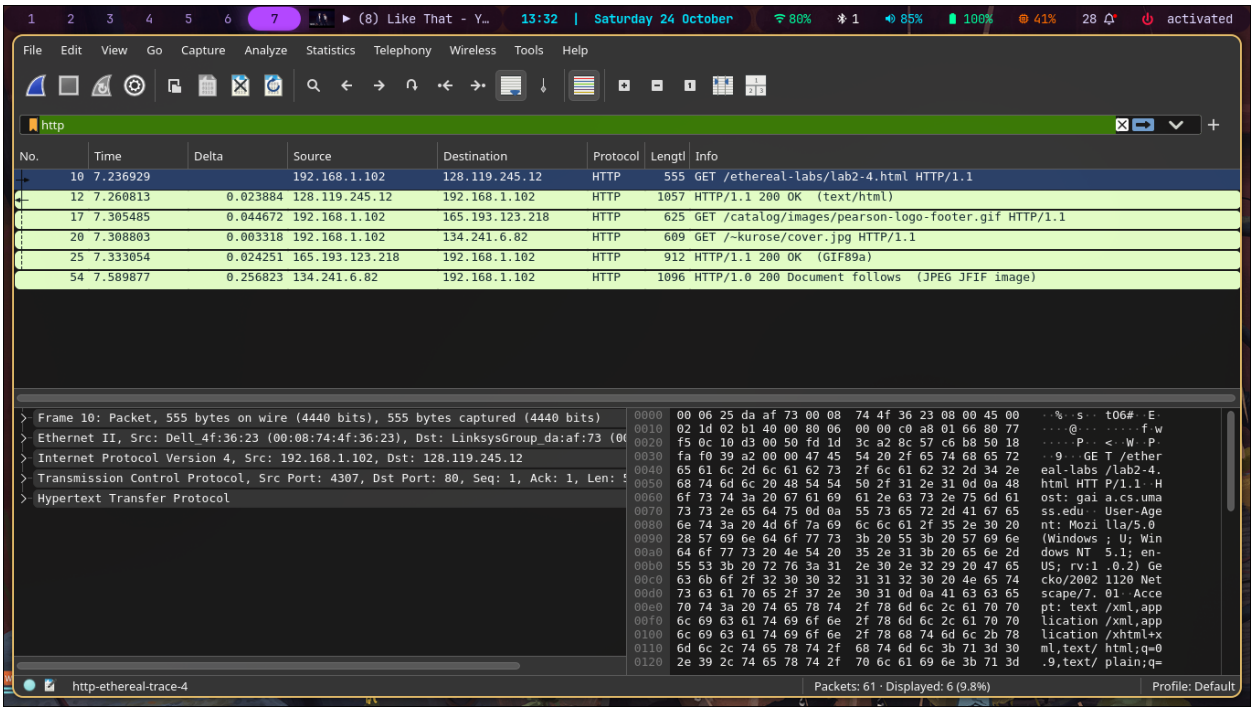

## Ans14:

200 OK

## Ans15:

4 data-containing TCP segments were needed to carry the single HTTP response and the text of the Bill of Rights. Their payloads are 1460, 1460,1460 and 436 bytes for a total of 4816 bytes.

# Activity 4 :

## Ans16:

There were 3 HTTP GET request messages sent by my browser. They were sent to the following Internet addresses:

1. 128.119.245.12
2. 165.193.123.218
3. 134.241.6.82

## Ans17:

The two images were downloaded in parallel. The browser sent the GET request for the second image (packet 20, 7.308803 s) before the response to the first image (packet 25, 7.333054 s) had been received.The two images were fetched from two different web servers over two

separate TCP connections that overlapped in time, so the browser did not wait for one download to finish before starting the other.
